

Hello Cessna R/TR182 Owners & Pilots,

This coming Tuesday 12/3(see below) is our Zoom discussion with Dave Pasquale on cylinder borescope image interpretation. If you can join live it will be worthwhile – if not it will be posted on the club YouTube channel. Hopefully Dave's expertise provides motivation to all to do cylinder borescoping if you're not already. Calendar invites to follow.

If you've not seen the Electroair EIS Zoom below it is also worth the time. There's no other such content available we're aware of. Please reply to below Ops & Maintenance postings with your input.

Richard Collins *Resolution* article below is great way to end your flying year, looking towards 2025. Collins suggestion to slow down to go faster is another timeless observation that applies today as it did 61 years ago.

We have Terry Aavang from Poplar Grove Airmotive scheduled for 12/10 Zoom to cover the new Lycoming rod bushing AD. Long sleeve t shirts are arriving this week so will be in touch with those who ordered.
